## **Let us show you how to develop a profitable practice using our proven programs!**

- Develop a new practice or repurpose a practice that focuses on diet and lifestyle intervention
- Ensure that your practice will be profitable
- Attract patients who are interested in taking control of their health
- Learn specific protocols that address the whole person, and that have been shown to result in better outcomes for most common conditions
- Adopt proven methods of motivating and sustaining diet and lifestyle change
- Develop and deliver effective educational curricula that lead to improved health

### **What makes our programs different?**

- Live instruction – you will have an opportunity to ask questions and interact with our outstanding instructors, and health professionals and participants from all over the world
- Broad spectrum of conditions covered, including coronary artery disease, diabetes, autoimmune diseases, allergies, asthma, inflammatory bowel disease, reflux, hormone regulation, cancer, children's health issues, Alzheimer's Disease, depression and mental health, ADHD, and more
- Information about how to treat the whole person – the reality is that most of today's patients are complicated. They have several health issues, take multiple medications, and often are being treated by many specialists. Simple dietary changes will not resolve their issues in many cases.
- Goes beyond nutrition to cover psychological issues, choices about cancer treatment, musculoskeletal conditions, diagnostic testing, and evaluation of treatment protocols
- **Practical application – not just information, *but what to do with the information and how to build a practice using it***

### **Two options: build a practice on your own or join our network**

#### **Why Join Our Network?**

- Name recognition
- Client/patient support – includes personal contact, goal setting, assistance with connecting with resources and other hands-on support
- Formal curricula for teaching diet and lifestyle habits, and other health information
- Passcode protected members' site with over 150 workshops – new ones posted weekly
- Hundreds of hours of workshops ranging from structured cooking classes to disease and treatment specific programs
- Thousands of articles to facilitate informed discussion with patients
- Opportunity to be in business for yourself but not by yourself

**Let's schedule a time to talk about how our programs can benefit you**
