About Wellness Forum Health

Our company specializes in InforMED™ Medical Decision-Making.

For consumers we offer:

- objective information about diets, tests, health conditions, and treatment options
- programs designed to help people transition to healthier diet and lifestyle habits

The InforMED™ Consumer has a clear understanding of risks and benefits of all health-related decisions and the ability to choose the best options for achieving, re-gaining, or maintaining optimal health.

For health practitioners we offer:

- training that includes specific protocols that lead to better long-term health outcomes
- access to informational libraries and tools that facilitate InforMED discussions
- educational programming to facilitate diet and lifestyle change
- affiliate and professional development programs that facilitate practice-building

The InforMED™ Practitioner engages in collaborative discussions with patients, and provides educational programming that empowers patients to take control of their health and to change their diet and lifestyle habits.

Program Overview

We offer programs for both those who are already trained for healthcare-related business and practices, and for those who seek training to enter the healthcare field.

Our curricula is designed to show you how to develop a successful and profitable practice based on InforMED™ Medical Decision-Making and Diet and Lifestyle Change.

We can help you to:

- Develop a new practice or repurpose a practice that focuses on diet and lifestyle intervention
- Ensure that your practice will be profitable
- Attract patients/clients who are interested in taking control of their health
- Learn specific protocols that address the whole person, and that have been shown to result in better long-term outcomes
- Adopt proven methods for motivating and sustaining diet and lifestyle change
- Develop and deliver effective educational curricula that lead to improved health

Our programs are different!

- Live instruction – you will have an opportunity to ask questions and interact with our outstanding instructors, and health professionals and participants from all over the world
- Broad spectrum of conditions covered, including coronary artery disease, diabetes, autoimmune diseases, allergies, asthma, inflammatory bowel disease, reflux, hormone regulation, cancer, children's health issues, Alzheimer's Disease, depression and mental health, ADHD, musculoskeletal issues and more
- Information about how to treat the whole person – most of today's patients are complicated. They have several health issues, take multiple medications, and often are being treated by many specialists. Simple dietary changes alone will not resolve their issues in many cases.
- Goes beyond nutrition to cover psychological issues, choices about cancer treatment, musculoskeletal conditions, diagnostic testing, and evaluation of treatment protocols
- ***Practical application – not just information but what to do with the information and how to build a practice using it***

What Is InforMED™ Medical Decision-Making?

Being InforMED™ means the consumer is presented with objective information about a health-related issue in order to choose the best options for care. This includes all diets, supplements, tests, drugs, and procedures. This is very important since it is common for consumers to be told the benefits (often exaggerated) and not the risks (which are often quite significant) of health-related options.

WFH staff and associates have developed objective criteria and a system for looking at options for patients which include:

- Observe the Hippocratic Oath: first and foremost do no harm
- Treatment of the whole person
- Address the cause of disease
- When possible choose the least invasive option
- Acknowledge the difference between statistical significance and meaningful difference
- Drugs and procedures become the “alternative medicine” when diet and other non-toxic and non-invasive treatments do not work
- Study design, conflicts of interest, sample size, duration of follow-up, the extent to which research identifies a cause-and-effect relationship, selection bias, replication of findings, and other factors that influence reported outcomes.

When developing materials and programs for use with consumers, we use **prescriptive communication**, which means information is conveyed in a manner that is specific, can be well understood, leads to a desirable outcome, and is actionable. Prescriptive communication is the norm in some areas of healthcare. When dispensing pharmaceutical drugs, for example, patients are told how many pills to take, how many times per day to take them, and whether or not to take them with food. On the other hand, discussions of risks and benefits often are not accompanied by written decision tools, and diet and lifestyle advice is often given using terms like “more,” “less,” and “moderation.”

In our experience, clear, concise and accurate information, usually presented in writing, is a major contributor to both patient satisfaction and better outcomes.

Benefits of Affiliation

The Wellness Forum Health Affiliate Program is designed for anyone who is in a health-related field. We invite doctors, nurses, dietitians, nutritionists, physical therapists, athletic trainers, mental health professionals, yoga teachers, and anyone else who is engaged in offering health-related advice to join.

The purpose of affiliation is twofold; to provide you with structured programming and products to offer to your clients/patients, and to generate additional income for your practice or business. Building a health-related business can be challenging, in part because there are so many things to do. One very important task is to create and administer educational programming that teaches people how to take more control over their health. Using our programs and products to support your practice saves you from having to create your own, and allows you to focus on spending quality time with the people you want to help. An added bonus is that affiliation with us allows you to generate more revenue.

Our Current Resources:

- Thousands of hours of programming and thousands of referenced articles to facilitate evidence-based discussions (new materials are developed weekly)
- Effective practice templates and protocols
- Profitable practice models (practitioners do not have to decide between doing the “right” thing and the “profitable” thing)
- Proven intervention programs for chronic/degenerative diseases (food-borne illnesses), psychological issues, and musculoskeletal disorders
- A diverse line of quality health-promoting products
- Well-developed marketing strategies
- Comprehensive training programs that allow practitioners to duplicate our success
- Well-developed infrastructure for support
- Established 501(c)(3) nonprofit to provide funding for research
- Our own school for training health professionals: *The Wellness Forum Institute for Health Studies*
- Excellent international reputation

The Affiliate Program allows you to be in business *for yourself* but not *by yourself*.

Free Resources

Dr. Pam Popper's Weekly Newsletter

This newsletter is sent via email every Monday and features articles about diet, health and medicine; an "Ask Dr. Pam" section; and announcements of upcoming events and learning opportunities.

Video Clips

These "news programs" are emailed to subscribers on Tuesdays and Thursdays each week. During these short videos Dr. Pam reviews published research, distilling important points from articles into easy-to-understand information for viewers. This is an easy and entertaining way to stay up-to-date on relevant scientific developments.

To subscribe, email your first and last name and email address to pampopper@msn.com .

Professional Membership

**Joining is the best way to learn more about our approach to healthcare,
and our programs and services.**

Benefits Include:

- **InforMED Health 101.** This course includes a textbook, online videos, and regularly scheduled instructional sessions which are held at our office in central Ohio. Members all over the world can participate since the course is also taught live via teleconference and via video platform on the members' site. Curricula includes a review of the science of diet and health, and the skills needed to adopt a program of dietary excellence TM and optimal habits.
- **InforMED Health 201: Introduction to InforMED Medical Decision-Making** Includes detailed information about how to read and evaluate information and research about diet, health and medicine; how to find capable practitioners; and how to understand blood tests and other diagnostics. Taught live at our office, via live teleconference, and video platform online.
- **Members-Only Website** - in addition to recipes and other helpful information, members have access to a growing library (over 140 right now) of workshops on a variety of topics, ranging from food preparation to cancer treatment.
- **Preferred Pricing** on select educational programs and national conferences
- **Free shipping** on orders over \$250 (continental US only)
- **Health Briefs Library** Over 2000 articles, most with references, on hundreds of topics related to diet, health and medicine. Includes articles from the weekly newsletter. New articles are posted almost every week. Search engine capability; articles can be emailed or downloaded.
- **Advanced Study video platform** Detailed slides and lectures based on important health-related books covering topics ranging from the study of genetics to cancer treatment. At least two new lectures are added each month.
- **Ask Dr. Pam video platform** Short videos with commonly asked questions ranging from skin rashes to terminal illnesses
- **"Things You Should Know" video platform** Short lectures, with slides, on topics of interest such as vitamin D, B12, dental X-rays, preventing colds and flu, and seasonal affective disorder. New lectures are added monthly.

Membership fee: \$320 (a la carte price for above benefits \$1347, save \$1027).

The Wellness Forum Institute for Health Studies

The Wellness Forum Institute for Health Studies is the first school in the U.S. to offer certificates and diplomas based on the philosophy of evidence-based healthcare using diet and lifestyle as primary intervention tools.

Most educational programs for health care professionals allocate little time to teaching practitioners how to treat the cause of disease and instead just focus on symptom suppression. A growing dissatisfaction with traditional medical and nutrition practices has created a demand for different educational pathways that incorporate such training. The Wellness Forum Institute is grounded in the use of only the most rigorous and independent scientific standards for evaluating health information.

Format: Classes are offered via “virtual classroom” or live and interactive teleconference calls. Students anywhere can participate as long as they have access to a computer, email and can make long distance calls. Detailed slides and course materials are provided. Due to the teaching format, we are able to recruit the best teachers in the world for all subjects.

The Diet and Lifestyle Intervention Course

39 CME's for physicians; 39 contact hours for nurses; 39 level 3 CPEs for dietitians

This program will teach you how to develop a practice using diet and lifestyle as primary intervention tools; and specific protocols for helping people to regain/maintain their health. It is designed for doctors, physician assistants, dietitians, nurses, physical therapists, nutritionists, and all health professionals, but participation is open to anyone. Topics include the science of plant-based diets, diet and disease, diabetes, heart disease, autoimmune diseases, gastrointestinal diseases, women's health, men's health, children's health, vaccinations, mental health, cancer treatment, and musculoskeletal conditions
You do not have to be a practitioner to take this course; laypersons are welcome too!

Why and How to Withdraw From Psychiatric Drugs Research does not support the idea that “chemical imbalances in the brain” are the cause of mental illness. Yet today, 25% of Americans, including millions of children, are taking psychiatric drugs for conditions ranging from ADHD to schizophrenia. Research shows that psychiatric drugs are not effective (barely better than placebo). Instead, the drugs have significant side effects that are often disabling and sometimes life-threatening. Furthermore, the drugs do not address the underlying causes of the individual's suffering and impairment such

as childhood or adult losses and trauma, emotional conflicts in the family, poor self-discipline, difficulties focusing and persisting, real life crises, and self-defeating attitudes.

This unique program was developed by Wellness Forum Institute and psychiatrist Peter Breggin, M.D., a leading promoter of empathic therapy and a pioneering researcher in the toxic effects of psychiatric drugs and how to withdraw from them. Participants will learn guidelines for prescribers, therapists, patients and their families involved in psychiatric drug withdrawal, with emphasis on a collaborative effort that is empowering to the patient and family.

The course fills an important need. Although there are many books and classes that address aspects of drug withdrawal, there are no formal and comprehensive training programs that teach practitioners, patients and families “the whole story” – the actual causes of psychological issues, the consequences of drugging, and effective methods for helping people to extract themselves from “the psychiatric mill.” This is the first comprehensive training program that addresses all aspects of this issue.

The Nutrition Educator Program is for individuals seeking a career in a nutrition-related field and looking for an alternative to traditional dietetics. This program requires that students complete basic science courses that are more rigorous than those required for many undergraduate nutrition degrees; includes courses that combine nutritional science with strategies for assisting clients in achieving and maintaining optimal health, and effective approaches for common degenerative conditions; includes many classes designed to teach practical skills needed for gainful employment; and concludes with 200 hours of practical experience during which a candidate must demonstrate his/her ability to work effectively in the nutrition education field.

Certification and Online Learning Courses

The Biological Causes of Autism and Effective Treatment Options. The incidence of autism has increased and continues to increase – so much so that one research group estimates that by the year 2050, 50% of American children will be affected. Why is this happening? What can be done to prevent this? And what should parents do if their child begins to regress? This course will provide answers to both health practitioners and concerned parents. **Tuition \$495.**

Children's Health. Topics include how parental health influences children's health; breast feeding and breast feeding challenges how good eating habits and tastes are formed; how to change eating habits and tastes; how to introduce solid food to infants; social and other situations involving children for ages toddler through young adult; common childhood illnesses and diet and natural therapies. **Tuition: \$395**

Allergies/Asthma. Topics include the relationship between factors like genetics, diet, hydration, vaccines, weight status, and hormones on development of allergies and asthma; diet and natural treatments for resolving both. **Tuition \$195**

GI Disorders. Topics include overview of the gut microbiome, and common conditions including reflux, diarrhea, constipation, nausea, ulcers, colon cancer, colonoscopy and other diagnostic tests, gas and bloating, leaky gut and celiac disease. **Tuition \$395**

InforMED Consumer Series. Includes how to read and interpret information about health (practical experience looking at and evaluating journal articles), how to conduct your own research, how to read your blood test results (what DO those number mean?), evaluating risk factors, how to choose doctors and other providers. **Tuition \$195**

Cancer 101. Defining cancer (how it develops, characteristics of various types of cancer), theories about cancer causation, diet and lifestyle causes of cancer, how to evaluate and choose cancer treatments, surviving a cancer diagnosis, diet and cancer treatment. **Tuition: \$695**

Forming and Maintaining Optimal Habits. This course is for both health practitioners and consumers, and will address what stands in the way of health improvement – *if people know what to do, why don't they do it?* Topics will include the psychology of change, obstacles to change, overcoming resistance to change, compulsive behaviors and how to change thinking and behavior in order to change weight and health status.

Tuition: \$395

Become a Food Over Medicine Certified Instructor. This is your opportunity to begin or enhance your career in the nutrition and/or health fields. The curriculum for the course is based on Dr. Pam's book and will provide you with the knowledge you need in order to help others. Completing it will also increase your credibility, which will help you to reach more people.

The course is offered through five 2-hour video lectures delivered by Dr. Pam Popper, during which you will learn: the optimal diet for humans and the science to support it; the relationship between diet and disease and how diet can be used as an intervention tool; how to instruct patients/clients in managing their healthcare – includes tips on how to interview and interact with/manage doctors; how to assess healthcare options; and how to coach people through making these decisions; how to read, understand, and interpret research studies so that you can continue to learn on your own.

Upon completion you will receive a certificate, you will be listed as an instructor on Dr. Pam's website, and you will be authorized to teach the Food Over Medicine Course to consumers (and charge for the program!). Slides for community presentations and course materials are provided. **Tuition \$199**

Women's Health Certification Course. Includes information about hormones, PMS, breast health, menopause, weight gain, bone health, and other specific health issues concerning women. The course includes four video lectures delivered by Dr. Pam Popper, and detailed slides for each lecture. Upon completion you will receive a certificate, you will be listed on Dr. Pam's website as an instructor, and you will be authorized to teach a women's health course to consumers. Graduates will be provided with slide sets for teaching the course. **Tuition \$395**

Weight Loss Certification Course. Over half of the people living in Westernized countries are overweight, and an increasing percentage of those people are obese. The failure rate for weight loss programs is over 99%, which means that it's time for a new approach for helping people to lose weight. In this course, you will learn about the influences that contribute to weight gain, which include historical eating patterns, packaging and advertising for food, emotional eating, and social pressures. You will also learn new and effective strategies for weight loss based on the *real reasons* people overeat. We promise you will learn new things; this is not another series on eating less and exercising more! The course includes 4 video lectures and detailed slides. **Tuition \$395**

Wellness Forum Health Personal Chef Certification Offered by Chef Del Sroufe, *New York Times* best-selling author, internationally known celebrity chef, with over 25 years of experience in developing recipes, preparing food, overseeing food service operations, and working with individuals who have special dietary needs. This program is designed to train people who want to be personal chefs or personal chefs wanting to develop additional skills, including the basics of the business using a plant centered approach to cooking. Students will learn general meal planning and meal planning for special dietary needs (gluten free, IBD, allergies, heart disease, cancer, etc.); sanitation basics; how to price and market your services; licensing and insurance needs; how to prepare meals in clients' homes.

At the end of this course, you will be certified as a Wellness Forum Health Personal Chef, you will be able to show that you are qualified to offer personal chef services; effectively work with clients from initial contact through menu planning and food preparation; market yourself as a personal chef trained by an internationally recognized expert. This course is conducted via video lectures with notes and slides provided by Chef Del. Students will be given homework assignments that will prepare them to be gainfully employed in this field. All assignments must be completed according to Chef Del's specifications in order to be awarded the designation at the end of the series.

Tuition \$495.00

Business Training For Health Professionals. This course is for people who want to start a business offering diet and lifestyle-related services or who want to expand an existing business *without investing a lot of money*. This course will show you how. After identifying your goals, you will develop a business plan, a directory of services and pricing. You'll also learn low-cost marketing strategies that work, how to develop workshops that turn prospects into clients, effective speaking, teaching and coaching skills, and long-term strategies for growth and success.

Classes are taught via five video lectures. A workbook is provided to facilitate development of a business plan based on the material covered in the lectures.

Tuition: \$149

Men's Health. Topics include prostate health, benign prostate hyperplasia, PSA testing, prostate cancer, erectile dysfunction, Low T, vasectomy. **\$395**

Vaccines: What Every Clinician and Patient Should Know A comprehensive, evidence-based course designed to facilitate informed decision-making about this very important topic. No hype, just the facts with supporting documentation from medical journals, government websites, and other reliable sources. Developed by Dr. Kathy Waller, former immunology professor at The Ohio State University, this course covers ALL of the most important topics related to this issue, which include immunology basics, the history of vaccines, detailed explanation of all of the diseases for which vaccines are recommended, along with risks of developing these diseases, detailed description of each vaccine currently recommended, along with information about adjuvant ingredients, data on side effects for each vaccine, vaccine research – how studies are conducted, herd immunity, vaccines and autism, vaccines and pregnancy, The National Vaccine Injury Compensation Program, travel and vaccine requirements.

Format: 60-90-minute lectures posted on a video platform. Each lecture is accompanied by a detailed slide presentation which can be downloaded by students. Dr. Waller is available via email for questions from participants. **Tuition: \$395**

Not a Health Professional and Would Like To Be One? Become a Certified Health Educator

We are excited about helping more people to regain and maintain their health through diet and lifestyle change, and to learn how to make better choices about medical care. We have the best and most comprehensive programs that address these issues, and we want to make our programming available to more people. We know that the best way to do this is through associates who can educate, inspire, and support our members.

Our training program is comprehensive and will teach you everything you need to know in order to start a health education practice. You do not need any previous training to qualify. If you are currently practicing healthy habits (or are ready to start), are willing to lead by example, have an outgoing personality, a strong work ethic, a desire to learn new things and are motivated to help other people, you are a candidate for this program.

For more information and to schedule an interview, email pamopper@msn.com

Professional Mentoring and Development

Classroom time: 24 hours - two interactive teleconference per month, 2 hours each
In addition to topics outlined below, class participants can submit questions, topics, and disease conditions for class discussion.

Business

Section I Setting Up Your Practice Defining scope of practice, legal issues; Development of services directory and pricing; Insurance issues – malpractice and reimbursement; General business details including business models, location, budgeting, and business planning; Time management; Compliance with HIPAA laws

Section II Marketing and Sales Framing your marketing message, low-cost and effective strategies for attracting clients/patients, selling and communication skills, developing printed pieces, newsletters and periodicals, referrals.

Section III Curricula and Workshop Development, Teaching and Presentation Skills Developing organized and effective curricula for teaching any topic; Teaching skills – using prescriptive communication to incentivize patients and clients to take action; How to develop effective promotional workshops; Presentation skills; Converting questions into sales of services

Clinical Skill Development

In addition to the curricula described below, classes include practical experience in the form of patient/client analysis, review, and development of intervention/action plan. Class participants can submit their own patients/clients and samples will also be provided by the instructor.

Introduction to Clinical Skills How to organize your schedule; dealing with family and friends; Intro to patient and client analysis; Learning to make constructive and targeted recommendations; motivational interviewing – the most important questions to ask; mutual goal setting with patients and clients; how to collaborate with patients/clients and conduct informed discussions; how to develop realistic plans for health improvement; reviewing food journals and offering actionable suggestions; follow-up schedules and health maintenance; consistency in practice – remaining detached from outcomes, promoting personal responsibility.

Clinical Skills II Criteria for evaluating medical studies as applied to outcomes-based patient care and application of criteria in evaluating and advising patients; how to do your own research, where to look, reliable sources of information; how disease mongering has changed diagnostic criteria – implications for diagnosis and goal-setting for patients/clients; how to assess risk and judge benefit of a medical intervention; how health messages can interfere with helping patients and clients; a careful examination of population screening for conditions ranging from vitamin deficiency to cancer

Clinical Skills III Facilitating informed discussions between your patients/clients and their prescribers; Informed decision making for cancer patients; constructive and responsible use of dietary and herbal supplements and other adjuvants; collaboration with other health professionals, assembling a team.

Investment: \$200 per month for six months

***This is an opportunity to sharpen your skills, increase your confidence,
and build a stronger business/practice!***

Meet The Principals

Dr. Pam Popper is a naturopath, an internationally recognized expert on nutrition, medicine and health, and the Executive Director of Wellness Forum Health.

Dr. Popper served as part of Dr. T. Colin Campbell's teaching team at eCornell, teaching part of a certification course on plant-based nutrition. She has been featured in many widely distributed documentaries, including *Processed People* and *Making a Killing* and *Forks Over Knives*, which played in major theaters throughout North America in 2011. She is one of the co-authors of the companion book which was on the *New York Times* bestseller list for 66 weeks. Her most recent book is *Food Over Medicine: The Conversation That Can Save Your Life*.

Dr. Popper is featured as one of the lead experts in a new documentary, *Food Choices*, which was released in September 2016, and is co-authoring the companion book for this film. She also appears as an expert in several new films which will be released in 2017-2018.

Dr. Popper is also a lobbyist and public policy expert, and continually works toward changing laws that interfere with patients' right to choose their health provider and method of care. She has worked on changing laws in several states, testified in front of legislative committees on numerous occasions, and has testified twice in front of the USDA's Dietary Guidelines Advisory Committee.

Dr. Pam Popper is a straight-talking professional who is not afraid to criticize national health organizations, government agencies, medical professionals, pharmaceutical companies, agricultural organizations and manufacturing companies, many of whom have agendas and priorities that interfere with distributing truthful information and promoting public health.

Del Sroufe is a partner in Wellness Forum Health Holdings and Executive Chef and director of the company's food division, where he is responsible for menu development, marketing strategies, developing and teaching cooking classes, employee hiring, training and management, kitchen management, compliance, purchasing, customized menus for people with health issues, development of internship programs, public speaking, media interviews, account development and general business management. He has been involved in the food business for over 20 years, with experience ranging from restaurant management to owning and operating a retail bakery.

Del is the author of the *New York Times* best-selling *Forks Over Knives: The Cookbook*, *The China Study Quick and Easy Cookbook*, and *Better Than Vegan*. His newest book is *China Study Cookbook: Family Style*. Del has achieved notoriety as a chef nationwide, and has cooked for some of the most famous plant-based doctors and teachers.

Dr. Peter Breggin, M.D. is known as "The Conscience of Psychiatry" for his many decades of successful efforts to reform the mental health field. His scientific and educational work provides the foundation for modern criticism of psychiatric drugs and electroshock (ECT) and he promotes more caring and effective therapies.

He has been a consultant to the Federal Aviation Agency (FAA) on the effects of psychiatric drugs on pilots, and recently was the key expert witness in hearings before the U. S. Congress on psychiatric drug-induced violence and suicide in the military.

He has authored more than 50 peer-reviewed scientific articles and more than 20 books including the bestseller *Talking Back to Prozac* (1994, with Ginger Breggin). Based on his clinical and forensic experience, he presented numerous examples of tragic adverse drug reactions in his book, *Medication Madness: The Role of Psychiatric Drugs in Cases of Violence, Suicide and Crime* (2008). He summarized the dangers of psychiatric drugs and described how to withdraw from them in *Psychiatric Drug Withdrawal: A Guide for Prescribers, Therapists, Patients and Their Families* (2013). Dr. Breggin's newest book is *Guilt, Shame and Anxiety: Understanding and Overcoming Negative Emotions*.

Dr. Breggin is a graduate of Harvard (with Honors) and Case Western Reserve Medical School. His psychiatric training included a Teaching Fellowship at Harvard Medical School. After finishing his psychiatric training, he became a full-time consultant at the National Institute of Mental Health (NIMH) for two years. He has taught at many universities. Dr. Breggin's private practice is in Ithaca, New York where he treats adults, couples, and families with children.

Eileen Kopsaftis, P.T. Ms. Kopsaftis has been in physical therapy private practice for 18 years and specializes in manual techniques for restoring pain-free movement and postural symmetry. After observing that while traditional physical therapy offers some relief for patients, it often does not restore patients to full function, she sought training from several dozen institutions and individuals and eventually developed her own "brand" of physical therapy. She has designed a comprehensive training program for physical therapists that teaches others to offer outcomes-based therapy to patients.

Janice Stanger, Ph.D. Dr. Stanger is a nutritionist, health industry expert, speaker, and author. She has researched, written, and spoken extensively in the area of whole foods, plant-based nutrition. Her book *The Perfect Formula Diet: How to Lose Weight and Get Healthy Now With Six Kinds of Whole Foods* integrates over 1,000 published studies to analyze the interaction of diet and environmental toxins with the development of inflammation and chronic disease.

She has also served on the Executive Board of San Diego Organization of Healthcare Leaders, as the Cochairman of the Business Forum on Aging (American Society on Aging), and on the Editorial Board of the *Business and Aging Networker*. Stanger was the Lead Faculty Member of the Masters Program in Healthcare Administration for National University in 2002 to 2003. She has worked extensively with employers on health insurance and worksite wellness programs.

Dr. Stanger has authored or coauthored over 30 publications focusing on the health care industry in professional journals or for informational company marketing materials, and presented at over 25 professional association meetings. She has been cited in over 80 media interviews in major newspapers, magazines, and journals, including *Wall Street Journal*, *New York Times*, and *Business Insurance*.
