

The Forbidden COVID-19 Chronicles August 23 2021

**Pamela A. Popper, President
Wellness Forum Health**

Announcing...

The Defeat Breast and Prostate Cancer Initiative 2021!

September is "Prostate Cancer Awareness Month," and October is "Breast Cancer Awareness Month." I usually spend 60 days complaining about how misguided the "celebration" is. Instead of focusing on reducing the risk of cancer, sponsors promote unhealthy foods with special packages and logos; medical centers promote mammograms and PSA tests (both ineffective strategies for reducing the risk of dying of cancer); and non-profits funded by Big Food and drug companies experience a windfall in donations.

We have a better idea: an education campaign designed to show people how to reduce their risk of cancer.

Both men and women will be asked to sign a pledge card committing to:

**Eat Well Move More
Address Stress Reduce Body Fat**

Individuals who sign the pledge will receive these rewards:

- **a \$100 gift card** that can be applied toward one of our educational programs
- access to an online platform with lectures on cancer, referenced articles, and healthy recipes

Participants who get 25 (or more) people to sign pledges will receive **an additional \$100 gift card!**

We will donate \$25 to Best Friends Sanctuary in Utah for every gift card redeemed by November 30, 2021.

This campaign starts September 1.

School Has Started: Let the Psychological Torture of Children Begin!

For months, school officials and board members led parents to believe that their opinions and input mattered. Acting on that belief, parents attended school board meetings, wrote letters, delivered speeches, wrote more letters, chased the school board members out of the building, submitted scientific articles, and delivered expert

testimony. The result of all of this busy work – the kids are masked up, and COVID insanity is in full force in America’s schools.

In some school systems, all students in grades K-6 are required to wear masks, while masks are optional for grades 7-12. Some school systems started the school year with no mask requirement, which resulted in about 48 hours of normalcy until the fake testing began. According to a recent article in *USA Today*, thousands of kids throughout the U.S. are currently in quarantine because of rising “cases.”

For example:

- New Orleans School District had 299 cases, and has quarantined over 3000 students and staff.
- Ware County in Georgia closed all schools after cases started rising and over 800 students and staff are now in quarantine.
- In Mississippi, 20,000 students are quarantined.
- Many schools in Texas have shut down. Four school districts that opened with masks optional are now closed due to “cases” and even though there is a state order against masking in schools, administrators are requiring masks anyway. Iraan-Sheffield Independent School District in West Texas closed for two weeks to quarantine all students and staff.
- 6000 students and staff in Hillsborough Public Schools in Florida are now quarantined.

It looks like life in the “more free” states like Texas and Florida is not so free after all.

There are more examples, but you get the idea. Not enough children were adequately psychologically and physically damaged last year, so those who are trusted with America’s children are doubling down to make sure they destroy an entire generation of kids during this school year.

Had enough? We will help you get your children out of these dystopian places we used to refer to as schools. It’s easier than you think, and you will sleep better at night knowing that you have rescued your kids before the really bad stuff starts to happen (like vaccination without your permission).
