

How to Fight Medical Tyranny

The opinion piece I'm sharing with you today was written by Gary D. Barnett and posted on Lew Rockwell's site on February 28 2023. It's titled "The Uselessness, Risk, and Extreme Danger of Mass Protest as a Solution to Tyranny." I decided to provide a link to this article in my newsletter because Barnett states so eloquently what I have been saying for almost three years: most of the things that most people spend their time on have no effect on resolving medical tyranny and government overreach, and some actually make things worse.

The time is right for this essay for several reasons. First, while some people fantasize about things getting better and going back to "normal," we are nowhere near the end of this debacle and the accompanying nonsense that government and health officials can and will inflict on us. Second, more people will need to get involved if we expect to regain our rights and save our country. Fortunately, people seem to be realizing this, and inquiries about joining our efforts have increased lately. Third, and most important, this war only ends if and when enough people wise up and start investing their time on effective strategies.

I link is provided below but if for some reason it does not work, you can enter the title of the article in a search engine and find it that way.

For more information about how to join our efforts, email pampopper@msn.com.
